

Amendment to the Specification:

Please add the following paragraph after line 11 on page 20:

Referring now to Figure 8, a display assembly according to one embodiment of the present invention is shown. The display assembly comprises a backlight device 810, a BEF 820 structure, a light reflective material 830, a plurality of spacers 840, a transparent sheet 850 and a light reflecting film 860.
The backlight device 810 is substantially similar to the backlight device 410 of Figure 4A. The BEF 820 structure operates substantially similar to the BEF 420 that has been described above. According to one embodiment, the light reflective material 830 is similar to the top surface 432, as described above with respect to Figure 4A. It is appreciated that the plurality of spacers 840 are substantially similar to the spacers 433 of Figure 4A. According to one embodiment, the transparent sheet 850 is substantially similar to the top sheet 435, as presented above. In one embodiment, the light reflecting film 860 is substantially similar to that of front light reflecting film 440 of Figure 4A.
